18 feminist artists Emma Watson loves and you will too

March 8, 2018

These are the feminist artists you need to know about.

Emma Watson, the actor, activist, UN Women Goodwill ambassador and Vogue Australia's March cover star and guest editor, talks us through a list of her favourite trail-blazing feminist artists—simultaneously highlighting the issue of inequality in the art world and the under representation of female artists.

Mary Beth Edelson

A true pioneer of feminist art and political activism, Mary Beth Edelson's influence and impact on the art world has been huge. I love how accessible, playful and theatrical her work is, using cultural references— from film noir femme fatales to Da Vinci's 'Last Supper' - to challenge how women are portrayed in art and in the media.
